Live Results on the Web

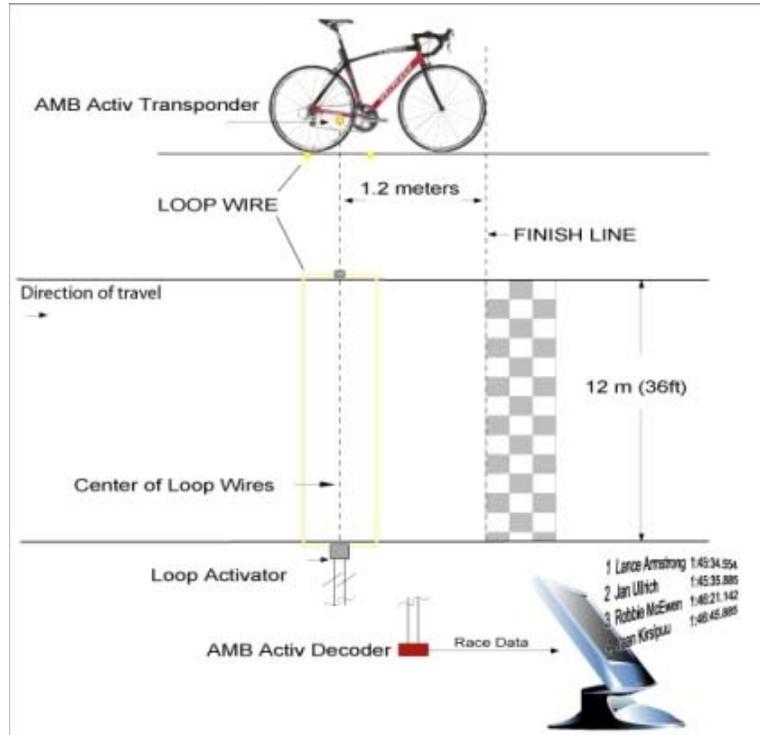

The latest technology, combined with years of experience, has resulted in the Activ timing and scoring systems. The AMB Activ is specifically designed for Activ Sports Bike, Running, BMX, etc... This system is based on personal transponders with a unique number for each rider.

STAT Timing teams up with AMB. In order to offer a fast, easy, quick and reliable data handling, STAT Timing has been using AMB Transponder Technology for years. We have been covering cycling events such as the National Mountain Bike since early nineties, Tour Trans Canada, Grundig MTB World Cups and many motorsports events.

Providing Professional Timing Services for Cycling Events

Why STAT Timing ? When you need reliability, flexibility, and ease of service, it is time to hire professional for your event. We have been involved in sports timing and data handling in numerous sports events since 1983.

Benefits of the AMB Activ system and STAT Timing

- Live Results – Posted on your organization Web Site
- Video monitor for the announcer
- Series Points Standing available right after the race
- On Line – Race registration
- Air Conditioned Timing Unit – Mobile Race Office
- Operational within a few minutes after installation
- Professional sound system
- Information can be sent to a scoreboard or television screen.
- All historical data of the race can be sent by email to each racers
- All timing data can be sent live to two way pagers, cell phone SMS, etc....

Providing Professional Timing Services for Cycling Events

Whether you are racing a National MTB events, a BMX provincial event, a road race criterium, Mountain Bike Marathon or an endurance event at your local racetrack, an accurate and reliable automatic timing and scoring system is essential for such an exciting and fast-paced sport.

Every race event is busy with a packed schedule and many riders. Delays in the schedule are unacceptable. Manually writing down each rider's number lap after lap, race after race can become quite an arduous task. For MTB things can be even tougher when the bikes are completely covered with dirt. It's an important job performed by the timekeepers and at the end of the day nobody wants to go home without the results. The "tools" for timekeeping are therefore crucial in providing an easy-to-use, reliable and accurate way to provide results instantaneously.

STAT Timing recognized the need for an accurate tool in the timing room and choose AMB system a long time ago. The AMB Activ is a system able to withstand the toughest racing circumstances: vibrating, beating and crashing while meeting the most basic requirements: 100% reliability with easy-to-use software and hardware.
